# THE PRINTING PRESS

Quick Facts:

- Johannes Gutenberg invented the printing press in 1450, a movable type system.

- The first major book printed using movable type was the Gutenberg Bible.

- The printing press played a major role in the Reformation. Books and pamphlets were the number one means of communication to the common people of Germany and greater Europe.

Gutenberg's Press

Make your own:

Cut out shapes or letters from craft foam and glue it on a square of cardboard. Brush paint on the foam, then press the stamp onto a piece of paper. Repeat!
